

## ASRP2

### Features

- Max 2-3A switching available
- AC output, DC input
- PCB Installs
- Outline size: 39.5×7.5×20(mm)

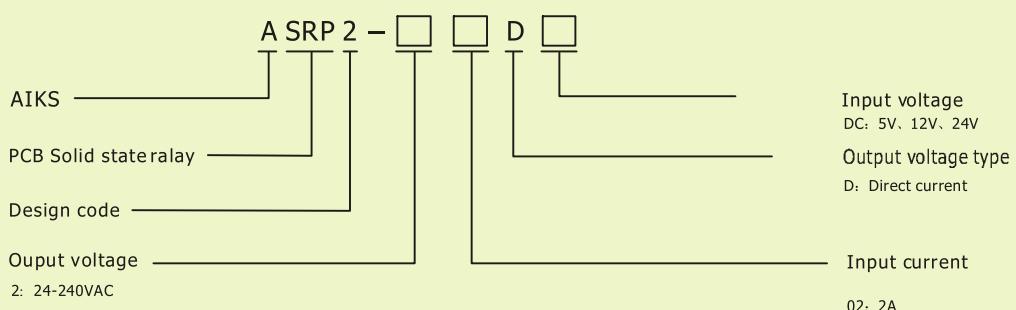

**CE**

### ► TECHNICAL PARAMETRIC

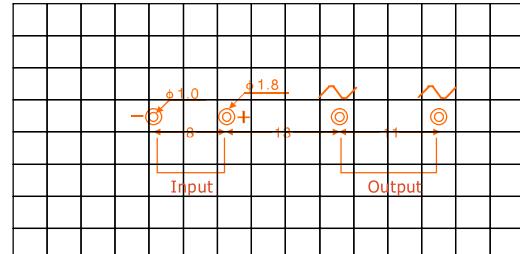

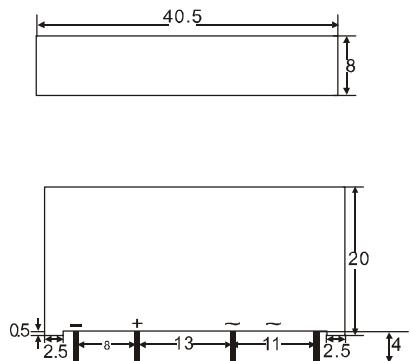

|                                       |                                |
|---------------------------------------|--------------------------------|
| Rating work current                   | 2A/3A                          |
| Breaths condition the control voltage | ≤3mA                           |
| Input control voltage                 | DC:5V、12V、24V                  |
| Work voltage                          | 24-240VAC                      |
| Active status instruction             | /                              |
| Guarantees breakdown                  | /                              |
| Guarantees shutdown voltage           | /                              |
| Ambient temperature                   | -30℃~80℃                       |
| Passes condition the pressure drop    | ≤1.3VAC                        |
| Make-and-break time                   | 10uS                           |
| Frequency range                       | 47~53Hz                        |
| Control current                       | 7~12mA                         |
| Dielectric Strength                   | AC2500V 1min                   |
| Terminal structure                    | Printing foundation plate post |

### ► MODEL DESCRIPTION

► OUTLINE DIMENSION WITH INSTALLATION SIZE

Unit: mm

breadboard radiation opening size (component side)
